CEMENT FR

Cement Plastisiser

DESCRIPTION

CEMENT FR is designed for use as a cement plasticiser or friction reducer. CEMENT FR makes high SG slurries more pumpable without compromising strength or setting times.

APPLICATIONS

Used in all drilling applications when high density cementing is involved. CEMENT FR is added to the cement slurry to increase pumpability and higher cement to water ratios.

ADVANTAGES

- Highly concentrated
- Simple and easy to use
- Mixes easily and immediately
- Reduces pump pressures
- Make low water high cement grouts

TYPICAL PROPERTIES

Physical Appearance	pH	SG
Brown Liquid	8	1.2

USAGE

- Mix at a ratio of 0.5 – 1.0 L per 200 L of cement slurry.
- Take care to not over treat
